UX Design Manager

May 2019 - Present

As the nature of my work is confidential. I won't be able to show any project visuals for the time being. However, I can provide a description of the work I've done.

# Portfolio | 01- OpenText - Products

## Projects - Enterprise Application

### E-discovery Security Product

Worked on Cloud electronic discovery application that provides enterprises with visibility across endpoints, servers and the cloud to search, collect and preserve electronically stored information (ESI) discreetly and in a court-admissible format.

### Pharma regulatory systems

POC interaction design for drug company that accelerates the discovery process by extracting actionable insights that drive pipeline innovation.

### Design System

I have worked on design patterns and components that are reusable across the organization.

The OT Design System powers hundreds of teams to deliver faster and with greater quality.

# Portfolio | 01- E-Discovery Security Product - UX Process

## My role as a UX Manager/IC role in each phase

Discover	Define	Develop	Deliver & Validate
<b>Solution as-is analysis</b> Learn how products were already addressing problems	Participate in Project Charter meeting and discuss UX roadmap for next product release	Worked on whiteboarding ideas with product manager and engineering team on various use cases	Deliver approved wireframe to Visual Design team
<b>Product discuss</b> with stakeholders, understand design brief, Epic, User story and use cases from PM	Create UX Design Epic for current release. Define all task within <b>Sprint Backlog</b>	Validated designs with core design review team as per user story provided by Product managers.	Review Visual designs for engineering team. Making sure the pattern leveraged existing components from OT guidelines
Defined Stakeholder map, Customer Journey	Document and Shared Interaction design link to PM and other stakeholder for further suggestions/approval	Share FIGMA link to Engineering team, so they can check all design specifications.	Support and help engineering team on various release stages

## Portfolio | 01-Design system - Success

### Results and Outcomes - Design System

#### **Definition of success:**

UX, Visual design, Engineering and Product manager using our design system for reference

The pattern allowed product teams to experiment more and deliver product features faster.

Helped engineering team to produce more consistent user experience.

## 02. PROJECT / Smith & Nephew

# Portfolio

## 02. Medical - Smith & Nephew

**Challenge**

Digitize Smith & Nephew product and combining three products into one system, a console, Image capture and Lens & light

**What I Did**

- Objectives & Goals
- Informal chat
- Experience Mapping
- Scenario's & User Journey
- Low and High fidelity prototype
- Formative - Usability Testing
- Visual Design

### Goal

- Innovate new ways to maximize the value of capital investments for customers
- Enhance Patient and Doctors communication

### Objective

- Minimizing the amount of equipment
- Annotate surgical images and videos

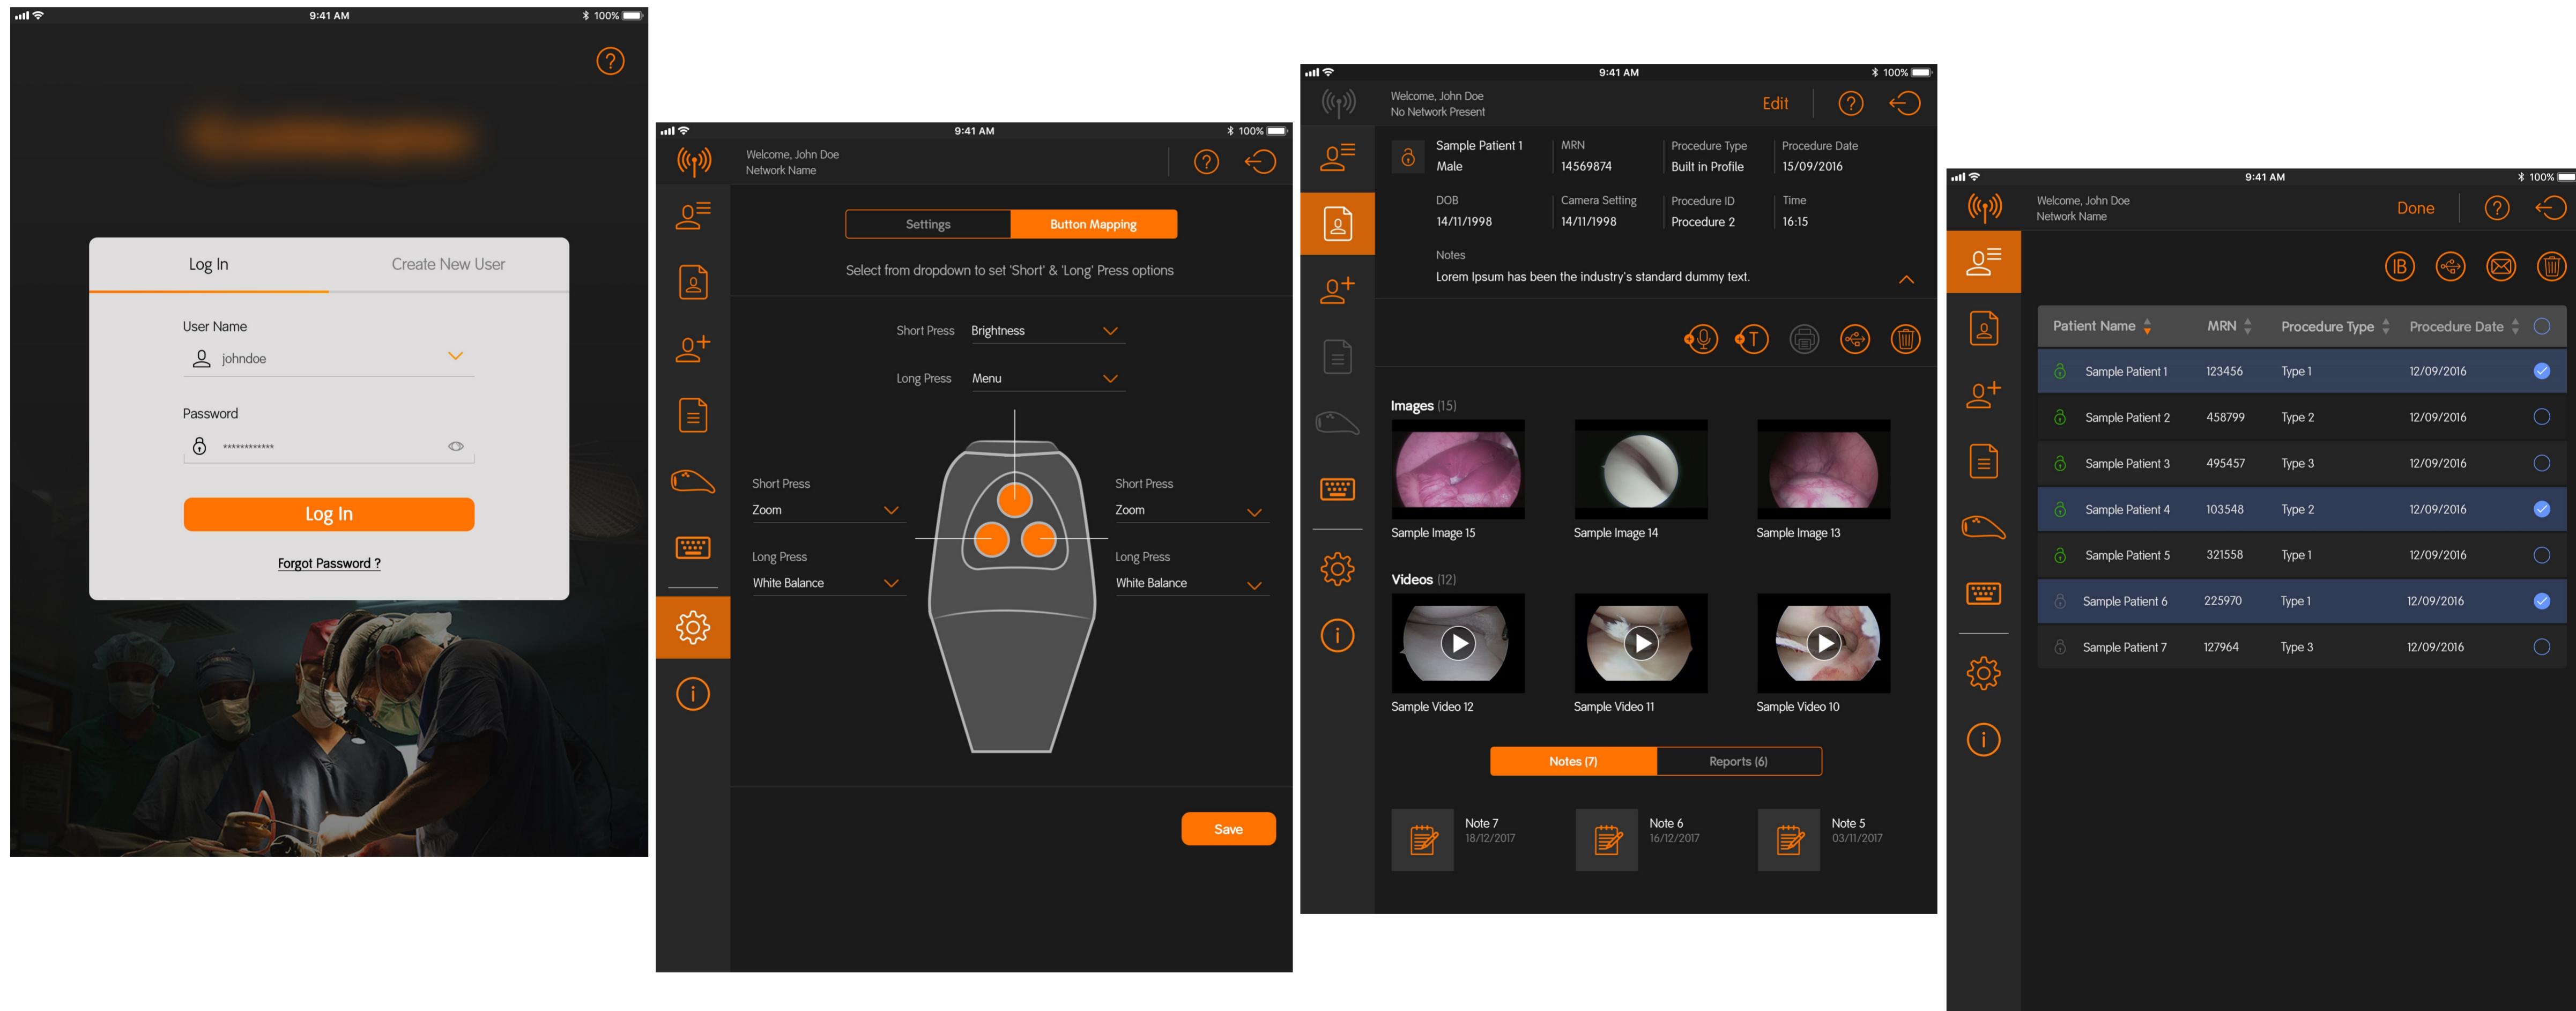

### User

Surgeon - both hospitals and Ambulatory Surgery Centers (ASCs)  
Admin Staff & Patient

# Portfolio | 02- Medical – Smith & Nephew

## Final Design - iPad

# Portfolio | 02- Medical – Smith & Nephew - UX Process

## My role as a UX Specialist IC role in each phase

Discover	Define	Develop	Deliver & Validate
Visited Smith and nephew Boston office and got lot of information regarding product. Understood business requirement form core stakeholders	Design brief and project timeline, Stakeholders meeting and expectations	Brainstorming design ideas and team collaboration	Deliver visual design, Specifications and assets to engineering team
Informal Chat with doctors and gather use case and scenario's, Understand problem areas	Identified Persona, User story and scenarios Worked on whiteboarding and sketches	Worked on lo and high fidelity wireframes, Validated those concepts with key stakeholders	Support and help engineering team on various release stages
Defined navigation flow		Completed final visual designs as per approved wireframe	

## Results and Outcomes

### **Definition of success:**

This App minimize equipment without compromising quality. App connect to your health system network for sharing reports, image & video

Enhanced Patient and Doctors communication

Enhanced Data management and portability

Enhanced product effency

# 03. PROJECT / GE Research Lab

# Portfolio

## 03. Oil & Gas – GE Research Lab Project

### Challenge

Digitize manual work like data entry and maintenance of the Lab.

### What I Did

Setting Objectives & Goals

Interview

Mind Mapping

Flow Diagram

User journey

Low and High fidelity prototype

Formative - Usability Testing

Visual Design

### Goal

- Reduced client cost of maintenance and improved efficiency & Quality
- Digital Product with 'Artificial intelligence' Experience

### Objective

- User Friendly application for Lab Operator, Test Engineers & Lab manager
- Factory approach to reduce development timeline

### User

- User - Lab Operators, Test Engineers & Lab Managers

# Portfolio | 03- GE Research Lab Project - IoT/AI Project

## Scope of work

### 1 Discovery

Get to know the project and identify the problem which needs to be solved

### 2 Research

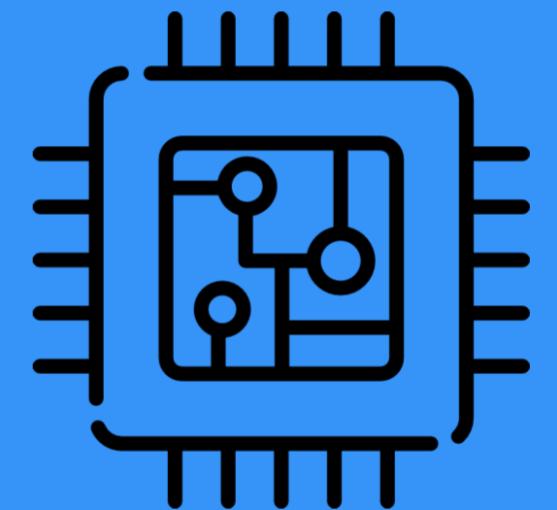

- User Painpoints
- Empathy Mapping
- Personas
- User Journey
- Stakeholder Mapping

### 3 Design

- Wireframe
- UX Design
- Visual Design
- Assets

### 4 Usability Testing

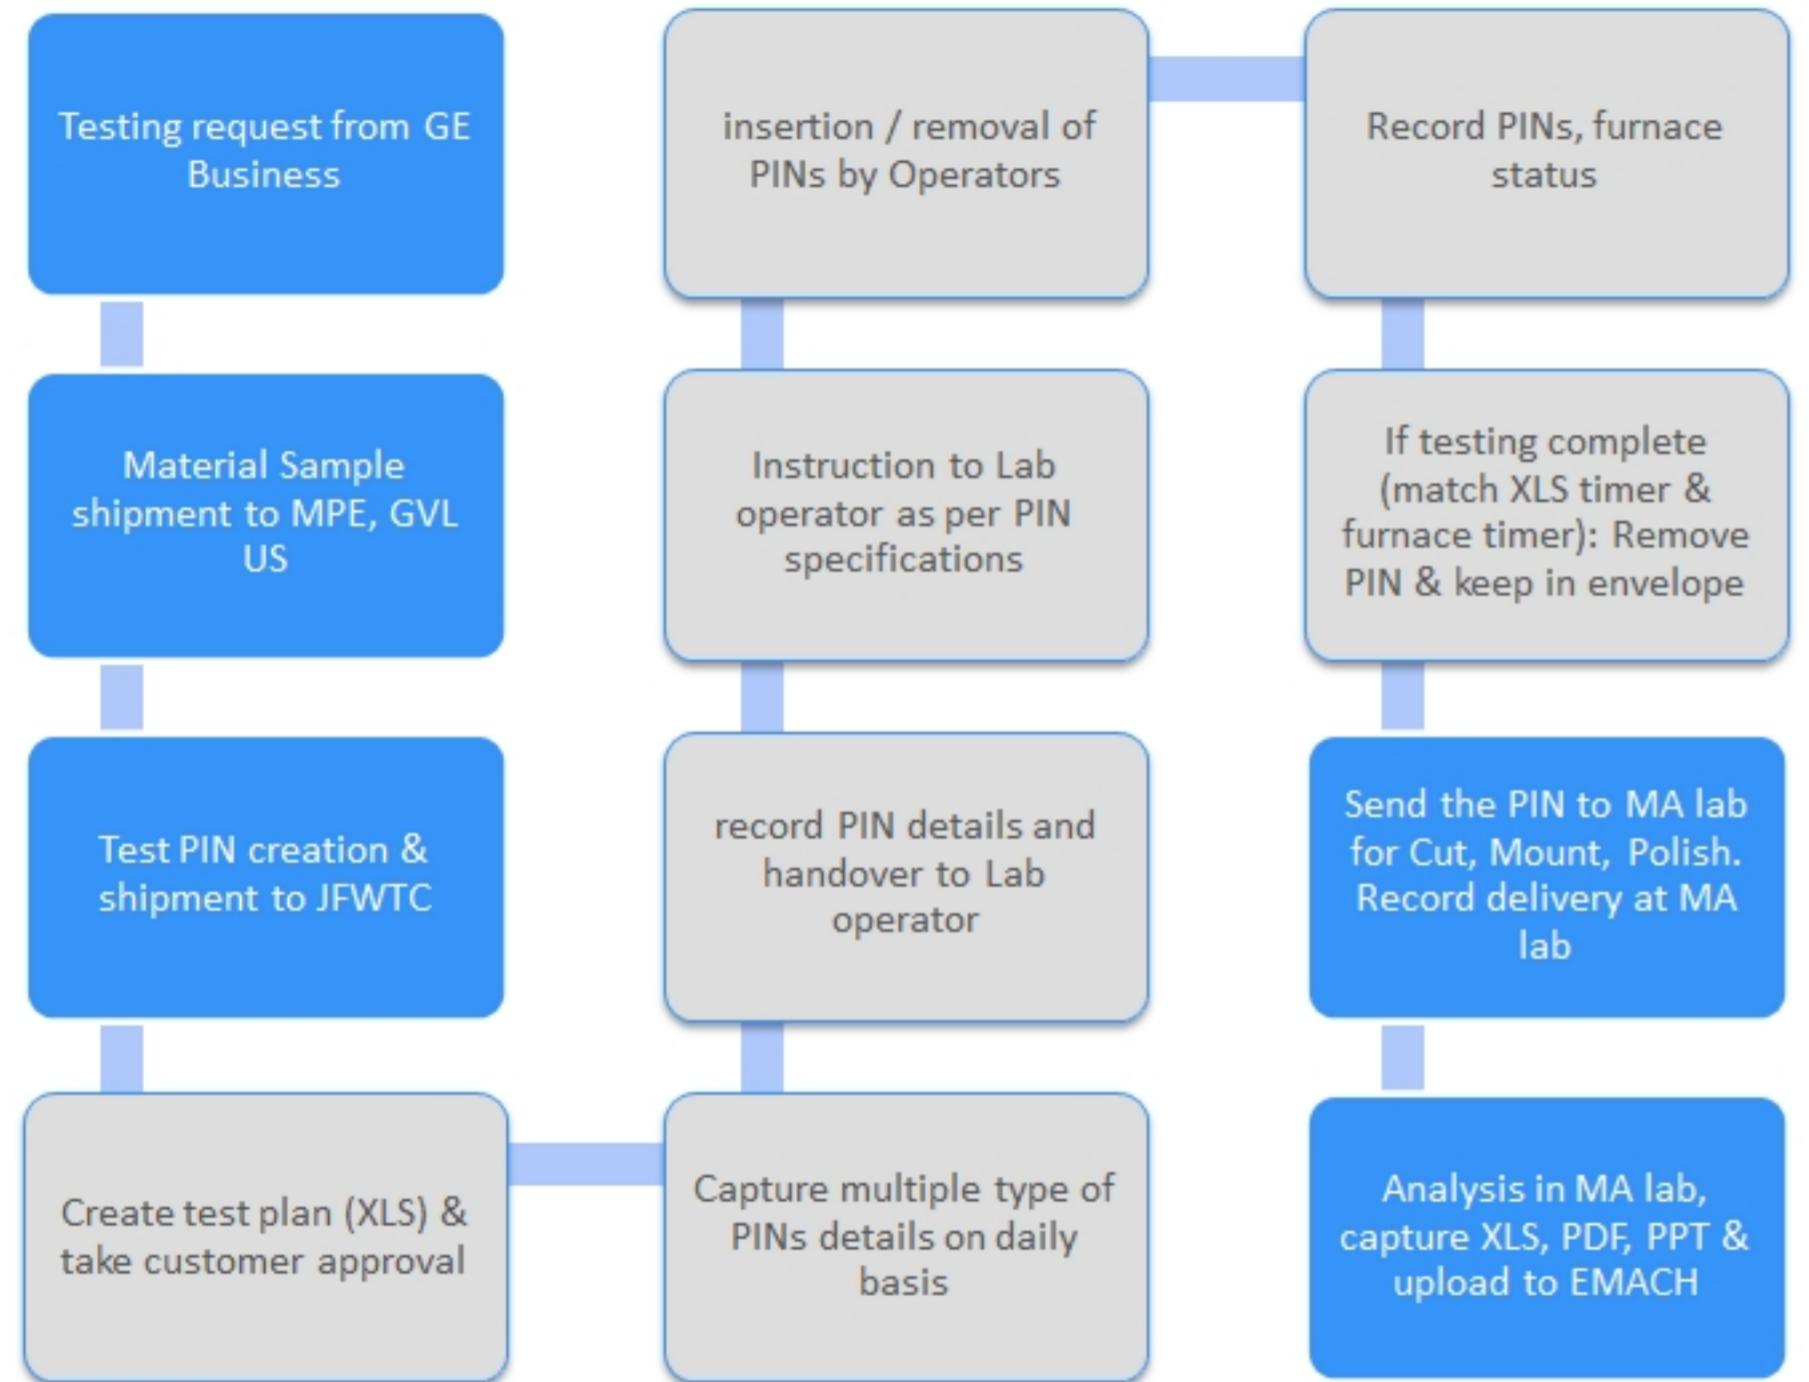

Usability Testing to understand product success

Gas Leak Detection Sensor  
Heat Detection  
Air pressure sensor  
level sensors

# Portfolio | 03- Oil & Gas – GE Research Lab Project

## Material Testing Process

# Portfolio | 03- Oil & Gas – GE Research Lab Project

## OHC (Oxidation Heating Corrosion ) Lab Flow

Prototype

The screenshot shows a prototype application for managing lab rigs. On the left, there's a grid of 12 boxes labeled RIG 01 through RIG 25. Each box contains the rig's name, current temperature, slot usage, and slot availability. Below this grid, there are two sections: 'CNG' and 'Diesel'. Each section has a 'Rig Details' box for RIG 01, which displays its current temperature (1200), slot usage (16 used, 4 free), and a 'Remove / Test Hrs' section with estimated times for slots 5 through 8. At the bottom of each section is a 'Temp vs Rigs' chart showing temperature distribution across the rigs.

High fidelity design

The screenshot shows a high-fidelity design of the OHC Lab system. It includes a video feed of a worker in a lab setting, a 'Rig Layout' section showing the physical arrangement of rigs in the OHC Lab and MA Lab, and a 'Task Frame' section listing various tasks for rigs 01 through 09, categorized by status (Completed, Pending, Due). The interface also features a 'My Program Room' section with a progress bar and a list of all programs.

# Portfolio | 03- GE Research Lab Project

## My role as a UX Specialist role in each phase

Empathize	Define	Ideate	Prototype	Test
Got opportunity to visit customer location physically and interacted with local customer	UX Strategy for iPad and Web based application application	Defined overall product journey to understand work flow	Define visual and interactions as per defined user story and validated same with key stakeholders	Come up with improvements based on feedback and usability testing
<b>Field observation/Informal Chat</b> with Lab technicians and service engineers	Design brief including Project plan, Business objectives, challenges	Explore multiple ideas to tackle complexity	Define visual and interactions as per defined user story and validated same with key stakeholders	
Collected feedback and identified problem areas	Defined Persona to understand their goal, needs and motivations			

### Results and Outcomes

#### **Definition of success:**

New project reduced their cost of maintenance and improved efficiency & quality.

Helped customer successfully to digitize their data entry manual work, save cost and time by using Artificial Intelligence technology.

# 04. PROJECT / Microfocus

# Portfolio

## 04. Microfocus - Reporting Software

### Challenge

Create Dynamic Product that includes multiple factors such as customizable dashboard, predictive feature, real-time reporting, automation of processes.

### What I Did

- Heuristic/Competitive Analysis
- Card Sorting
- Information Architecture
- Task flow
- Low fidelity wireframe
- Clickable prototype

### Goal

- Measure end user experience and performance issue before any business impact
- IT process automation and automated remediation

### Objective

- Intelligent Dashboard with flexible visualization and reporting
- Real-time predictive analytics to reduce problems faster

# Portfolio | 04- Microfocus - Reporting Software

## Final Design / Wireframe

Original review: Dec. 16, 2018

My \$1000 worth of closet organizers were scheduled for delivery Thursday evening and never showed. Calling customer service was not available at that late hour. Called Friday AM and found and 55 minutes of back and forth and holds before I could get my delivery rescheduled. 2 gentlemen and what looked like a rental truck arrived Saturday AM only to say they could not deliver because they have too many orders placed in front of my order and they would be back in an hour or so.

I went to an IKEA restaurant about 30 min before they closed. I asked for trash. It was told no. I complained to the cashier. She said she would tell her manager. Then she went to the person working in the back and made fun of me. I asked to see the manager and he nearly didn't care, but mentioned that the cashier manager was a different manager. I went through the store and saw the same cashier 3 more times. Then I ask the manager if she (the cashier) has already talked to her. She said no.

Everyone knows that IKEA is cheap. I have however NEVER had one order been done properly. Whether it is being rung up in the store, calling ahead to check availability or even recently ordering online. Even two simple pillow covers were days late than the package showed up with NO invoice and short one of the two covers. They clearly just don't care. It's about a quick time and they make zero excuse. If you try to call they will keep you on hold forever. If you don't give up they will treat you like you are insane for expecting respect and service. I don't know when it becomes okay to expect what you are paying for... even if it is cheap and crappy stuff!

Original review: Dec. 8, 2018

I purchased this sofa bed from IKEA that looks promising, online and in stores. We bought the sofa for \$799 tax, paid \$100 for delivery and \$100 for assembly. Guess what, after paying \$100 for the damn sofa bed, it fell apart in less than a month after purchase. The screw came right off and it won't assemble back. Fine, the product was damaged or the quality was bad, whatever, a few months later we decide to call the customer service, who advised that unless we have the receipt, we can't return it or exchange it. Understandable till, I'd say it's pretty reasonable.

## Tech Savvy and Non Tech Savvy

2 personas were created based on their awareness of ecommerce sites and frequency of online purchases

### Tech Savvy

**Bio**  
Rose lives in the city of New York. She is a hard worker, likes fast results and likes to be rewarded. She quit her job as a Marketing Consultant to be able to take care of her children. She is Smart, Tech Savvy, feels comfortable online, but Internet isn't always the first place she turns to for information.

**Personality**

Introvert	Extrovert

**Tech- Literacy**

Low	IT & Internet	High
Low	Mobile & Social Media	High

**Motivations**

Designer Products  
Value for money Eco-Friendly  
Personalization Convenience Comfort

**Top 5 Brands**

Pinterest  adidas  CHANEL  Etsy   
Expedia 

**Expectations**

- Value convenience and effortlessness in an application
- Familiar patterns
- Ease of use
- Consistent and trendy look and feel
- Self Explanatory Icons
- Easy findability of content

**Frustrations**

- Getting poor search results from online shopping sites
- Multiple steps to complete a task
- Inconsistency
- No filter or sub option to sort products

**Ambitious**  
**Focused**  
**Organized**

**Rose Gilbert**  
35, Female, Married  
Marketing Consultant & Mom  
New York, NY  
Capgemini Public

### Non Tech Savvy

**Bio**  
Chris is working in an automobile company since 15 years as a operations guy. He loves his job hence has never thought about changing for betterment. He loves certainty and doesn't like to take new challenges. He recently moved into a new home and is decorating it along with fiance, Rose. He is not very Computer-savvy and not very active on social media.

## Research & Analysis

### Protocol and Data Transcriptions

#### Protocol

Now I will give you certain scenarios, based on that you will need to perform a few things on the website. I would request you to hear it out and then do the task.

**Desktop tasks:**

**Task 1: Plan your Dream Home**

---

Go to [www.ikea.com](http://www.ikea.com) and select the country of your residence.

**Scenario**

You want to plan your home and are looking at IKEA to provide you planning solutions and help you bring your dream home to life. How will you go about it?

- 1) Check the Journey from [www.ikea.com](http://www.ikea.com) to selection of country of residence/Local Website.  
Note the responses to selection of region and country. Probe for any insights into if the user gets confused or would want a different kind of a local site selection option?
- 2) Check if the person is able to locate the Planning Tools > Start Planning Now image/link on the page by scrolling or does the user go to search for finding the same using search option.  
Probe further on the experience of the user in searching the planner.  
If the user is able to locate the planner, ask questions about:
  - Is it easy to use?
  - Is it Self Explanatory?Check the Journey.  
Ikea.com > Scroll down > Planning Tools/Start Planning Now > Go to the IKEA Home Planner (Button) > Check the agreement > Continue> Create a New Design > **Thank the user and End the Journey**

13 Participant	And the plus? What do you think it is?
14 Moderator	Umm.. I am not sure... Actually I just trying think what it would be for? It all sec... Adding something but I am not entirely sure
Participant	What it supposed for? That its like ... I don't know ... Its not home button... no... it wouldn't be a home button.. I am not sure... Its just something additional that hasn't been mentioned here.... That I would thought because... it will needs to be there... Its not here.., and usually when people would use that symbol over dropdown its like list a thing... may be this like... can ... may be this... a correspondence there... I don't ... know...
15	You can click on the map
16 Moderator	Okay... oh... this is clever... It's bit like google maps...
17 Participant	So for you what's wrong here?
18 Moderator	Umm! That's me... I think I doubt it that... I have to scroll up & down... And this is showing me... The
Participant	things around where I live... It shows me badminton and... Time...
19	Okay... and here you have these two buttons... Is it... and you can click on it...
20 Moderator	Oh.., It works as a map.. Okay... Oh.., Is it... not wait long.. And
21 Participant	and the other one?
22 Moderator	Ohhh... Also that a listing... Okay... that's a list of... ohh okay.. I see no no.. (Scrolls up & down)
23 Participant	ohhh.. okay.. I see now... (scrolls up & down)... Ohh.. Okay.. So I can Click on that.. they trace me...
24 Moderator	Okay so this is.. First version of the screen.. And I am going to show another version and you going to tell me what you see?
25	
26 Participant	okay... yeah.. (Moderator swipes left till reaches another version of screen)...
27 Participant	ohhh.. its different.. hardly see the difference... because it quite subtle difference.. (scrolls down)... Umm! ..it didn't have that saying such sport played (Unclear words 12:58 to 13:02)... earlier one.. what did I did not notice...
28 Moderator	that's it..
